

Manage multiple locations and access your production data anytime, anyplace, anywhere

Food safety and traceability are essential to the egg industry. Ovotrack offers a modular traceability solution, which can be implemented in full or in stages. Our system not only supports compliance with increasingly stringent legislation and customer demands, but also allows you to boost productivity, reduce errors and cut costs. An integrated report designer offers a range of options to present your management information.

Ovotrack offers separate solutions for:

- Grading
- Processing
- Hatcheries

Ovocloud

With our proven technology, Ovotrack is global market leader in traceability systems for the egg industry. To date, more than 100 Ovotrack Solutions have been successfully implemented at egg grading and processing centers worldwide. The Ovotrack Solution has proven to be the best solution for egg traceability, inventory management, and labeling, however the market becomes more

challenging every day. To keep in full control you need to be able to access your data anytime, anyplace, anywhere.

Let's say:

...just before you go to bed you want to check your ungraded stock on the grading floor to be sure you have the number of Large Eggs your number one customer needs tomorrow...

or

...on your way to one of your farmers you want to check the grading results of the eggs that were collected and graded yesterday and the week before...

or

... whilst discussing the promotions of next week at the headquarters of your customer, you want to show him the actual stock of their packaging on all three of your grading stations...

or

...you want to connect the traceability data from the QR codes on the consumer packs to the blockchain of a retailer...

then Ovocloud is your answer, Ovocloud is what you need.

Ovotrack. Knows where your egg goes

With Ovocloud we have taken connectivity and dashboarding to the next level. It's also the optimal solution if you want to manage multiple locations and allow access, manage and provide insights to 3rd parties.

Ovocloud enables you to access and share detailed information in a secure, cloud based environment from any laptop or mobile device. This remote 24/7 visibility into your information helps you to stay in control of your business, maximize your productivity and profitability. You can do live reporting on multiple locations on traceability, your grading/breaking results and inventory. Besides it offers you the option to check your historical data to help you do your forecasting and spot trends.
