Egg Grading

Ovotrack Solutions

Egg Grading

Other Modules

- FS** **On Farm Scanning**
Scanning farm labels at the farm with Android pocket PCs when picking up eggs.
- TW** **Truck Weights**
Connection of truck scale to Ovotrack and distribute weight over all pallets in the truck.
- WR** **Warnings at Receive**
Automatic warning generator for specific quality checks at the Receive Department.
- RW** **Receive & Weighing Scale**
Interface with a weighing scale at Ovotrack Receive and connect weight to incoming pallets.
- FS** **Farm Seconds**
Easy registration of farm seconds at the Receive Department.
- RG** **Receive Graded**
Labeling graded products delivered by others at the receive department.
- PQ** **Packaging Quality Registration**
Register damaged packaging to make your supplier accountable for it.
- SL** **Stock Locations**
Set up multiple sections in your warehouse to have a better and more structured overview of your stock.
- OC** **Origin Check**
Consistency check during packing whether the origin of eggs is in line with the final product on a specific packing lane.
- GR** **Grading Results**
Automatic collecting grading results and importing into Ovotrack.
- EB** **Egg Balancing**
Automatic correction of grading results after comparing with eggs received.
- GS** **Grader Seconds**
Tracking of graded seconds (crack, dirt, leaker) from different suppliers.
- IP** **Interface Prepack Printer**
Connect egg pack printers to Ovotrack and print (unique) product info on every consumer pack.
- CF** **Contiflow**
Print correct information on finished products, using contiflow in your process.
- PL** **SSCC Pallet Label**
Generating and printing the correct pallet label with SSCC barcode, which is connected to the sales order.
- SP** **Stand-Alone Palletizing**
Generating and printing pallet labels without connection to case labels.
- LU** **Label Data Updater**
Update and/or split your printed labels when needed.
- TS** **Task Scheduler**
Automatically generate, e-mail, print and/or save your reports on a set moment on the day or week.
- CD** **Custom Data Connector**
Connect data to all fixed barcodes in your process and use for any purpose.
